

COVID-19 Risk Assessment

This Risk Assessment (RA) has been carried out in accordance with existing Health and Safety Legislation in addition to current Government guidelines and information relating to the COVID-19 pandemic. This RA will be reviewed frequently in accordance with any changes in Legislation, Government guidelines and our own working practices. This document does not replace existing RAs and should be adhered to in conjunction with those documents.

This RA focuses specifically on minimising the risk of exposure to COVID-19 for anyone who works in or visits our offices or our floors within multi-tenanted buildings; employees, clients, visitors, suppliers and contractors. The core principles are:

1. Testing of all plant and equipment and services.
2. Implementation of an enhanced cleaning regime.
3. Provision of products to ensure everyone is able to take responsibility for their own personal hygiene and welfare.
4. Maintaining social distancing.
5. Provision of PPE.
6. Clear instruction, signage and communication.

Name of Assessor:	Wendy Thomas	Office:	All
Signature:	<i>Wendy Thomas</i>	Date of Assessment:	21 May 2020
Signature	<i>Wendy Thomas</i>	Date of revision:	09 July 2020

COVID-19 Risk Assessment

Activity	Hazard	Persons at Risk	Control Measures in place	A	B	Risk Rating (AxB)	Further Action Required
Operation of plant and equipment	Limited operation in recent weeks may have rendered services unsafe	All	<ul style="list-style-type: none"> a. Our offices have remained open throughout lock-down and therefore regular, routine PPM has continued on all services. b. Additional maintenance and checks recommended by our service providers due to the reduced usage of some services were undertaken prior to more staff and visitors returning to work and will continue as necessary. c. Air Handling Systems circulate fresh air and it is not therefore necessary to open available windows. Opening windows will cause inefficiencies to the operation of the systems. 	3	1	Low	No issues were identified in any premises.
Water systems	Exposure to bacteria due to reduced operation of systems	All	<ul style="list-style-type: none"> a. Additional water testing was carried and results obtained. Further testing will be carried out if deemed necessary. b. Filters will be changed on all relevant equipment. c. Facilities teams carry out frequent flushing of toilets and running of all taps. 	2	1	Low	No issues were identified in any premises.
